

Gorbel® Monorail Crane and GS Electric Chain Hoist are the perfect solution for a new process

Industry:
Manufacturing

Product:
Material Handling

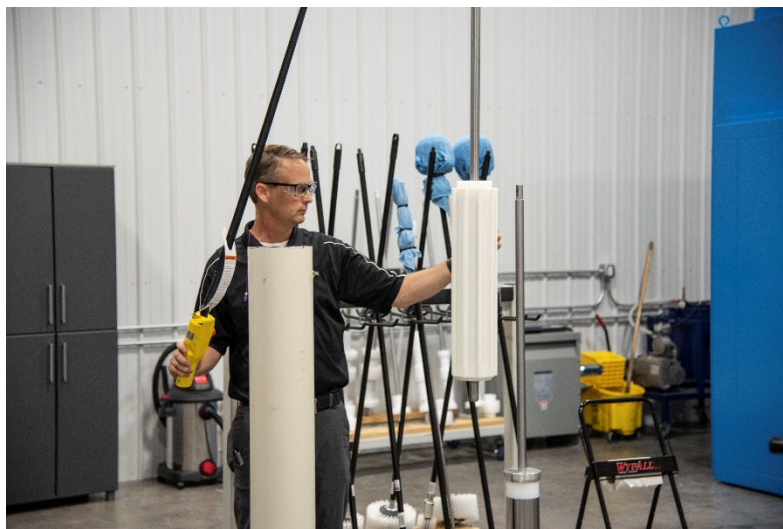

The Problem:
New process in facility

The Solution:
Gorbel® Monorail System and
GS Series Electric Chain Hoist

“Economical, Professional, Simple.”

Interroll, a manufacturer of conveyer rollers and other material handling solutions in Wilmington, North Carolina, was in need of a solution for a new process in their facility. The purpose of the new work cell is to cast a specific Polyurethane profile on top of a steel or stainless steel shell. They needed to be able to lower the tube assembly into

the mold and remove it once the casting process is complete. This was a new process for this facility, so there was no other process in place before.

They decided on a Gorbel® one ton monorail crane and Gorbel® Electric Chain Hoist.

Interroll has been using Gorbel® cranes and hoists for years and chose a Gorbel® crane based on past experience and performance, and they always exceed their expectations. A Gorbel Electric Chain Hoist is the perfect complement to a Gorbel® Monorail System, Work Station Crane, Jib Crane, Gantry Crane, or Cleveland Tramrail System. By adding chain hoists to the offering, Gorbel offers the most convenient delivery and installation in the industry.

Interroll chose this monorail system because it met the needs of the process and was the most economical solution.
