

Top Entry Collector for FS300, FS350 & FS350S

1. Drill holes in boom (if required), or attach mounting plate to boom (if required), refer to General Arrangement drawing for mounting assembly.
2. Attach the top entry collector to the mounting bracket using hardware provided.
3. Remove cover of collector.
4. Connect the lifting device to the collector through the outlet in the side of the collector.
5. Replace cover of collector housing.
6. Connect power source to the top inlet of the collector.

Refer to drawing TECA for additional references.
