**CBC - CASCADING
BELT CONVEYOR**

**TELESCOPIC
CONVEYOR**

PORTABLE

Easily relocate a CBC with its lightweight **aluminum frame** and **mobile casters**. Telescopic conveyors are immobile, being anchored to the concrete warehouse floor.

TIME

Installing telescopic conveyors can take weeks due to concrete work. **Reduce dock downtime** by deploying a portable CBC.

DEPLOYMENT

Complex concrete work can add large, unplanned installation costs. A CBC can **save upwards of \$15,000** in install costs.

SERVICE

Per OSHA standards, many telescopic conveyors are "confined spaces", requiring **3 technicians to service the machine**, increasing your ongoing cost of ownership.

UPTIME

When an anchored telescopic conveyor is down, your dock door is down. With CBC, you can **easily move it** for preventative maintenance and/or handling palletized loads with forklifts.
