

Destuff-it™
Restuff-it

Destuff-it™ and Restuff-it™ 2.0
Portable Ergonomic Conveyor Systems

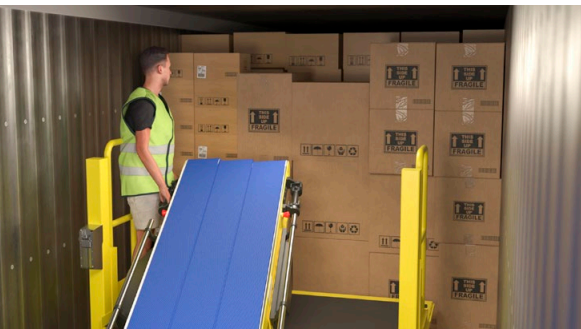

GORBEL®
A CLASS ABOVE

Excellence Reimagined

Operator Platform (DT200)

Reach the top of the box wall by lifting up to 30" (76 cm) from the floor. A lifting capacity of 550 lbs (250 kg) supports up to two workers simultaneously. Electric actuators ease service and maintenance.

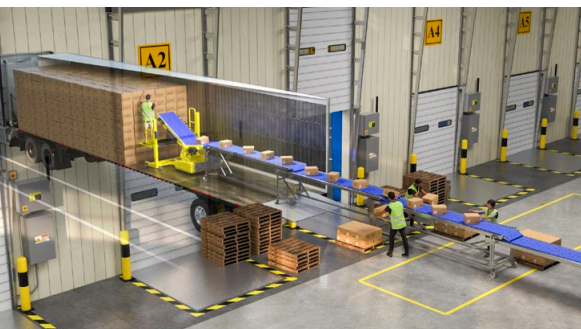

Ergonomic Pivoting Conveyor

The belt handles the heavy lifting by adjusting horizontally or vertically. The reimagined 27" (69 cm) wide 3-belt pivoting conveyor stays flush to the box wall, improving ergonomics and product transition between conveyors. A belt capacity of 165 lbs (75 kg) can handle your heaviest loads at conveyor belt speeds of 50 to 100 fpm (0.25m/s - 0.5m/s).

Drive System and Batteries

Move easily between doors on 48VDC battery power. These self-propelled machines easily traverse over dock levelers and transition plates. Zero-turn and new side-to-side "crab walk" features provide better maneuverability.

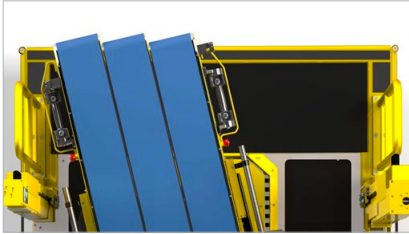

Conveyor Integration

Integrate Destuff-it with a variety of conveyor types, including:

- Flexible roller conveyors
- Telescopic belt conveyors
- Cascading Belt Conveyors
- Or even your existing conveyor!

3-Belt Pivoting Conveyor

Fits flush with box walls for better ergonomics & product transfer

Floating Rear Conveyor

Improves product transfer and conveyor integration

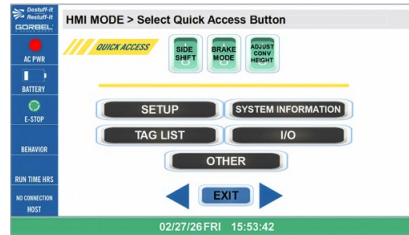

Lower Operating Voltage!

120V/30A North America
230V/16A Europe/Australia

Joystick Drive Controls

Intuitive one-handed joysticks (FWD & REV) simplify driving in and out of trailers

Operator Interface (HMI)

An operator and service console that improves user experience and serviceability

Productivity

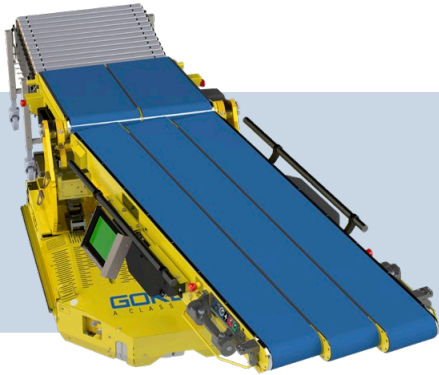

- One worker can achieve >1,200 cases per hour
- Increase throughput - Destuff-it unloads 50% faster than traditional, manual methods
- Reduce labor hours during seasonal peaks
- Improve dock utilization
- Turn trailers faster to reduce demurrage, wait, storage, or drop fees

Ergonomics & Safety

- Operator platform and pivoting conveyor allow workers to slide boxes, rather than lift them
- Destuff-it enhances ergonomics, helping reduce worker strain and injuries
- LEDs and fans provide workers with improved working conditions inside the trailer
- Safety sensors stop belt and machine driving when activated

NEW Destuff-it 2.0 Models

DT100
(without platform)

Save space and increase your flexibility with the **DT100** while improving both ergonomics and productivity. No operator platform.

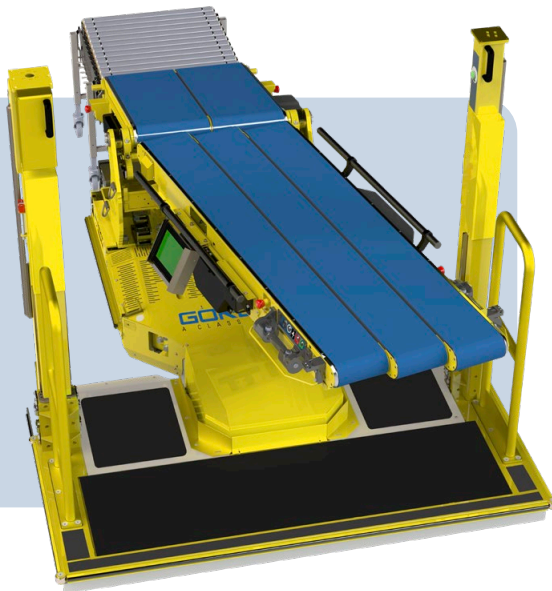

Return centers

Hybrid loads
(pallets and floor loads)

Last mile
truck loading

Space constrained
trailers

DT200
(with operator platform)

The **DT200** is designed with a lifting operator platform for operations with fully floor-loaded trailers that want to maximize ergonomics and productivity.
